Aggers Pump/Bander/TB Guns

Aggers Pump

68. Agger Cattle Pump
For a quick and easy oral administration of fluids to cattle

The new Agger's® Cattle Pump allows one man to deliver 20 litres of fluid into the rumen in just 2 minutes. It is robust and more economic. The formulae's supply large quantities of readily available, targeted, nutrients to cattle at risk of acidosis, ketosis, milk fever and dehydration.

69. Restore **450gm (12 sachets)**
For cows with risk of dehydration caused by failure to drink, diarrhoea, surgery (esp. caesarian section) or peritonitis.

70. Off feed **785gm (12 sachets)**
For cows with inappetance in early lactation and for correction of left displacement of the abomasum

71. Fresh Cow **700gm (12 sachets)**
For cows for freshly calved cows at risk of milk fever, ketosis (if dehydrated) and displaced abomasums.

72. Antacid **400gm (12 sachets)**
For cows at risk of acidosis and heat stress.

73. Glycerol Plus **1lt**
For cows at risk to Ketosis

Bander

74. The Callicrate Bander
The Callicrate Bander has earned a reputation as the most humane and effective bloodless castration method on the market.

75. Bander Loops

McLintock Preset TB Syringe

the McIntock® Syringe can be preset for the required number of doses up to twenty, each of 0.1c.c. Available:

- 76. McIntock Syringe (single)**
- 77. McIntock Syringe (Pair)**
- 78. Belt and Holster,**
- 79. TB Needles Size 3/8**
- 80. TB Needles Size 5/16**
- 81. TB Callipers (Calibrated)**
- 82. TB Testing Scissors (Serrated)**

83. McIntock Syringe Servicing & Certification

Duggan Veterinary provide an official Government certified TB repair and certification service to the Veterinary surgeon. The service provided is fast, reliable and economical. All McIntock syringes undergo a full examination and undergo a complete overhaul during service.

Vaccines/Antibiotics

Vaccines

1. Startvac **2ml (1 dose) & 10ml (5 doses)**
Indications: For herd immunisation of healthy cows and heifers, in dairy cattle herds with recurring mastitis problems, to reduce the incidence of sub-clinical mastitis and the incidence and the severity of the clinical signs of clinical mastitis caused by Staphylococci aureus, coliforms and coagulase-negative staphylococci.
Withdrawal: zero days
Dosage: 2ml Dosage (Classic Protocol – 3 doses, Alternative Protocol - 4 doses)

2. Hiprabovis Pneumos **10 dose vial / 50 dose bottle**
Indications: reduction in clinical signs and lung lesions caused by Mannheimia haemolytica serotype A1 and Histophilus somni, for bovine respiratory disease (BRD).
Withdrawal: zero days
Species: Bovine
Dosage: 2ml/animal. One dose per calf, at 2 months of age, repeated after 21 days. Vaccinate calves by subcutaneous injection in the prescapular area.

Antibiotics

3. Gentaject 10% **10% 100ml**
Constituent: Gentamicin
Indications: For the treatment of infections in horses susceptible to gentamicin, including Pseudomonas aeruginosa, Klebsiella, Rhodococcus equi and Salmonella spp.
Withdrawal: Treated horses may never be slaughtered for human consumption
Dosage: Intramuscular: Adult Horse 2 to 4ml per 100kg, Foal: 0.2ml per 10kg

4. Megapen- Strep **100ml**
Constituent: Dihydrostreptomycin Sulphate B.P, Procaine Benzylpenicillin Ph. Eur, Methylparahydroxybenzoate Ph. Eur as preservative
Indications: Treatment and control of infections caused by Gram-positive and Gram-negative organisms
Withdrawal: Meat 28 days, Milk 72 hours
Dosage: 0.5 – 1.0ml per 10kg bodyweight intramuscularly

5. Dexamethasone **100ml**
Constituent: Dexamethasone (as sodium phosphate)
Indications: For the treatment of primary ketosis and as anti-inflammatory agent in bovine and equine.
Withdrawal: Meat & Offal: 28 days, Milk 5 days
Dosage: Horse/cow 5 - 15ml (ca. 0.02mg/kg) intramuscular or intravenous injection

6. Kariflox 10% (Oral) **250ml & 1 litre**
Constituent: Enrofloxacin
Indications: Active against Gram (+) bacteria, Gram (-) bacteria and Mycoplasma, even at low doses.
Withdrawal Period: Meat: Turkeys and chickens 4 days; Eggs: Do not use for human consumption
Dosage: 10mg of enrofloxacin per kg of body weight per day for five consecutive days, corresponding to 50ml of product per 100 litres of water

Antibiotics

7. Tylosin 20% **100ml**
Constituent: Tylosin and Benzyl alcohol
Indications: Respiratory tract infections, mastitis caused by Streptococcus spp and Staphylococcus spp.
Withdrawal: Cows- Meat 35 days, Milk 4 days
Dosage: Intramuscular – Cow/calve: 10mg per kg body weight daily for 3- 5 days

8. Selectan **100ml & 250ml**
Constituent: Florfenicol
Indications: Effective in treating both PRDC and Bovine Respiratory Disease.
Withdrawal: Cattle: Meat and Offal: 30 days (Not permitted in lactating animals producing milk for human consumption) Swine: Meat and Offal: 18 days
Dosage: Cattle: 1ml of Selectan per 15kg – Intramuscular route twice 48 hours apart. Swine: 1ml of Selectan per 20kg - Intramuscular route twice 48 hours apart

9. Oxipra 20 LA **100ml**
Constituent: Oxytetracycline
Indications: A broad spectrum bacteriostatic antibiotic, active against most pathogenic bacteria which causes severe infections in farm animals.
Withdrawal: Meat 22 days; Milk 3 days
Dosage: 1ml of Oxipra per 10kg body weight – intramuscular

10. Eficur **50ml, 100ml & 250ml**
Constituent: Ceftiofur Hydrochloride
Indications: Bacterial respiratory disease, acute interdigital necrobacillosis, acute post partum metritis.
Withdrawal: Cattle: Meat and offal: 8 days; Milk: 0 days
Dosage: 1ml of Eficur/50kg bw/day.

11. Hipracin **50ml**
Constituent: Synthetic Oxytocin 10 IU
Indications: To promote involution of the post parturient uterus and thus aid the passage of retained placenta. To help control post partum haemorrhage.
Withdrawal: Meat and Offal: 12 hours; Milk: 12 hours
Dosage: Intramuscular - Cows; 1 to 4ml/cow, Sows & Ewes: 0.2ml to 1 ml/ animal

12. Enrocare 5% & 10% **100ml**
Constituent: Enrofloxacin
Indications: Effective against E-coli mastitis, Rapidly effective against E.Coli mastitis and key respiratory pathogens.
Withdrawal: Enrocare 5% - Meat/Offal 14 days, Milk 72 hours
 Enrocare 10%: Meat/ Offal 10 days, Milk 84 hours
Dosage: Enrocare 5% - 0.5ml per 10kg b/w for 3 days / Enrocare 10% - 2.5ml per 100kg b/w for 3 days

13. Vetrisol Inj **100ml**
Constituent: Trimethoprim & Sulphamethoxazole
Indications: Infections caused by micro organisms susceptible to trimethoprim and/or sulfamethoxazole.
Withdrawal: Meat/offal 35 days, milk 5 days
Dosage: Intramuscular – 1ml per 10 -15kg bodyweight daily.

Sedative/Fertility Drugs

Sedative
14. Sedaxlyn **20mg/ml**
Indications for use: Solution for injection for the sedation of horses, cattle, dogs and cats.
Constituent: Xylazine (base) 20.0 mg, Equivalent to 23.32 mg xylazine hydrochloride
Dosage: Cattle 0.05 – 0.20 mg per kg body weight IM or 0.25 – 1.0 ml injection solution/100 kg body weight IM 0.03 – 0.10 mg per kg body weight intravenously or 0.15 – 0.5 ml injection solution/100 kg body weight IV
Withdrawal: Cattle (meat) - One day. / Cattle (milk) - Zero days

Fertility Drugs
15. Dalmarelin **10ml**
Indications: For the induction of ovulation in cows and mares both for treatment of such conditions as ovarian cysts and for improvement of conception rates
16. Dalmazin **2ml & 20ml**
Constituent: D-cloprosetenol 0.075mg
Indications: For reproduction: Synchronization or induction of oestrus. Induction of parturition. Therapeutic indications: Ovarian dysfunction (persistent corpus luteum, luteal cyst), interruption of pregnancy including foetal mummification, endometritis/ pyometra, delayed uterine involution.
Withdrawal: Milk 0 days; Meat and Offal: Cattle 0 days
Dosage: Intramuscular, 2ml (150 micrograms). Repeat after 11 days of Synchronisation of oestrus.

Equine
17. Equipalzone Sachets/Pro Dynam - (Phenylbeut Powder) **100 sachets**
18. Epsom Salts (magnesium sulphate) **4kg**
19. Muddy Marvel/Summer Freedom **250ml**
20. Twydil Hemopar **1Lt**
21. Electrolyte Syringes (Twydil/Refuel) **10 Syringes**
22. Dermoline Insecticidal Shampoo (Lice) **500ml & 1Lt**
23. Ivermectin Equine Paste **10 & 24**
24. Pocket ID Scanner (Equine Microchips) **Size on Request**
25. Stomach Tubes **All Sizes**

Cattle
26. Teat Mint **500ml**
27. Louse Powder **350g & 3kg**
28. Calf Kickstart **240ml**
29. MHC Flush - Hygiene Flush **20 Boluses**
30. Nimrod Red Calf - Calf Stimulant **6 x 15.6g Syringes**
31. Decox Powder - Decoquinat - Medicated Powder **10kg**
32. Scourproof Extra **14 x 100gm**
33. Sulpha Powders - Sulphadimidine Sodium Powder **15g x 200**
34. Vetrisol Powders - Trimethoprim & Sulfadiazine **100 x 25kg**
35. CTC powder - Respichlor 15% **3 x 1kg**
36. Stimulex Powders - Ruminant Feed **12 x 100g**

Poultry
37. Mineral Powder **450g**
38. Mite Powder **120g**
39. Liquid Tonic **500ml**
40. Scaly legs **250ml 500ml**
41. Total Mite Kill **750ml**
42. Anti Peck Spray **500ml**
43. Poultry Worming Solution Multi Kit **1 Kit**

X-Ray/Gloves/Instruments/Needles

Sheep
44. Multilamb Rapid **225ml**
45. Lamb Colustrum **228g**
46. Sponges + Applicator **1 Unit**
47. Stimovar PMSG **7500iu**
48. Lamb Kickstart **100ml**
49. Lamb bottles and Teats **pull on – clear & black, latex**
50. Lamb Puller & Sling
