1.

2.

1. Sonotix (Ear Cleaner)

125ml

- Especially formulated to clean softly and in depth in ears of dogs/cats
- Offers a wide action spectrum with additional antiseptic, soothing, acidifying and regenerating properties.

2. Clytox (Eye Cleaner)

125ml

- External Buffered Solution for Around Eyes And Tear Stains (ph=7,4)
- Specially formulated to remove discharges and dried mucus secretions around the animals eyes.
- Cleaning and antiseptic and not irritating solution.
- Used regularly, it eliminates all the stains, pollens, or irritating dusts that can cause injury to the eyes.

3.

3. Ormillak Puppy (400gm + 1.4kg) & Kitten (350gm)

- Is a complete instant diet for suckling, enriched with minerals, vitamins, amino acids and trace elements. **It is the highest protein supplement for pups/kittens on the market (28%)**
- Ormilak can be used as a dietary supplement during pregnancy, throughout puppyhood and during ill health and convalescence, to assist in the return to normal health.
- **Each unit contains a complimentary feeder bottle.**

4. Zylkene Taking the stress out of life

75mg (up to 10 kg),
225mg (10 -20 kg)
450mg (20+ kg)

4.

Zylkene is not a drug as such, it is a food supplement made from a protein found in milk. The active ingredient is a peptide (a simple sort of protein molecule) which is able to bind temporarily to certain receptors in the brain. This has a calming influence which is similar in some ways to tranquilliser drugs such as diazepam ("Vallium"), but without the side effects.

5.

- 5. PlaqueOff™ Animal** is a completely natural product which is **suitable for both cats and dogs**. It is rich in natural iodine and contains important vitamins and minerals and is free from artificial colours, preservatives, gluten and sugar.

It is a special type of seaweed which has been found to have specific beneficial effects for oral care. It comes in a granulated form which is easily added to food every day.

6.

6. Buprecare (POM)

- Buprecare contains buprenorphine hydrochloride and is licensed for post-operative analgesia in cats and dogs; and the potentiation of the sedative effects of centrally acting agents in dogs.
- Buprenorphine is one of the most popular opioid analgesics in veterinary medicine.
- Longer duration of action than most other opioids
- Can be used safely with other non-opioid classes of analgesic for multi – modal analgesia
- Minimal adverse effects on the cardiovascular and respiratory systems during anaesthesia in dogs and cats (Taylor PM, Journal of Small Animal Practice, 1984.& Martinez EA et al, American Journal of Research, 1997)

7.

7. Cephacare flavour (POM)

50mg* (100 Tablets)
250mg (100, 250 Tablets)
500mg (100, 250 Tablets)

“Cephalexin..... is considered to be the first choice antibiotic in the treatment of superficial pyoderma because it is both extremely effective and very safe...” Toma S. et al., JSAP (2008)

- Beef flavoured (yeast extract) for easy administration and improved compliance
- Scored tablet for easier more accurate dosing whatever the weight of the patient
- Licensed for double dosing
- Licensed for cats and dogs
- Presented in blister strips of 10 tablets for easy dispensing
- Compact cartons for easy storage

8.

8. Benazecare

5mg, 20mg (POM)

- Benazecare contains benazepril hydrochloride and is licensed for treatment of chronic renal insufficiency in cats & congestive heart failure in dogs.
- Benazepril is the leading ACE inhibitor used in veterinary medicine
- Small tablets for easy consumption

9. Copro-nil

100g

- Treats Coprophagia in animals. Coprophagia (or the eating of faeces by an animal) is a very unpleasant behaviour and not considered normal.
- **How does Copronil work?**
Some of the ingredients act to counter dietary deficiencies that are known to contribute to coprophagia. Others help re establish the good bacteria in the gut, essential for producing some of the vitamins which may counteract coprophagia. While others break down in the gut to form products that animals find highly unpalatable.
- Can be used on Dogs, Cats and Horses.

10. Sashas Blend

Sashas Blend™ is now one of the best researched joint health treatments in the world!!

- The unique all natural Sashas Blend™ formula possesses anti-inflammatory actives which reduces inflammation in a non invasive method with no side effects
- May promotes the growth of healthy cartilage
- May improve the condition of the joints by helping maintain the fluid (known as Synovial Fluid) that cushions joints. The Synovial fluid is important for healthy joint function as it provides lubrication to the joint, supplies nutrients to the cartilage, provides impact protection for the joint and removes waste from the cartilage.
- Sashas Blend™ may also suppress the production of Nitric Oxide which is a major chemical produced responsible for pain and the breakdown of a healthy joint.
- Sashas Blend™ also contains the full range of GAGS (glycosaminoglycans) including Keratin, Dermatin, Heparin sulphates and the commonly known Glucosamine & Chondroitin sulphates which may provide the necessary nutrients required to help stimulate healthy joint function.
- Palatability and trial supplement amounts available on request from Duggan Veterinary
- Ideal For use in dogs and cats- extremely palatable powder formula.
- Now Available (Vet Only): Sasha Blend 100gm, Sasha Blend 250gm,
- Available Over the counter- Sashas Greyhound 100gm
